

APWF Concrete Initiative: Sanimap

Asia-Pacific Water Forum

Shinobu Fukumoto
Manager, Japan Water Forum
02/07/2010
Governing Council Meeting of the APWF

What is Sanimap?

- To provide a portal to bring together donors and implementing organizations of sanitation / hygiene projects / training courses

- **Sanimap is a sanitation database and a platform on the web providing a portal to bring together donors and implementing organizations for sanitation and hygiene projects or training courses.**
- **Through Sanimap, organizations in the sanitation and hygiene sector can promote their projects and display their progress visually.**
- **Anyone can use Sanimap free of charge.**
- **Implemented by the Japan Water Forum (JWF) & Water Web Alliance (WWA) in collaboration with the Sustainable Sanitation Alliance (SuSanA)**

What can users do?

- ACCESS, POST, and COMMENT on
 1. The proposals, progress & results of sanitation and hygiene projects or training courses
 2. Up-to-date sanitation of each country; and
 3. Information on the organizations in sanitation and hygiene sector

- Through Sanimap

- Organizations in sanitation and hygiene sector can promote their project and share current situations visually.
- Donors can find suitable organizations and projects to support, and monitor their projects and activities on demand.
- Journalists can offer information on sanitation on the internet.

As a database on sustainable sanitation activities, Sanimap will promote good practices and business model by sharing lessons learned online.
